

## **Instructions for Applying Your Paper Template – Ensuring a Perfect SleekTEAK Fit**

To guarantee your SleekTEAK deck covering fits flawlessly, follow the steps below using the provided paper template.

---

### **Step 1: Identify Placement**

Carefully identify where each piece of the template corresponds on your boat's deck. Lay out all paper sections before securing to ensure proper orientation and coverage.

### **Step 2: Secure the Template**

Using painter's tape, gently secure the paper template to the deck. Make sure the template lies flat and conforms to all curves and contours of the surface.

### **Step 3: Mark Any Modifications**

If any adjustments are needed—for example, shifting a cutout, altering an edge, or trimming around hardware—clearly mark the changes directly on the paper template using a pen or marker.

### **Step 4: Document Your Modifications**

Take clear photos of the marked-up template on the boat. Ensure the photos show the full area of the modification and any relevant reference points.

### **Step 5: Submit Feedback**

Email your photos and a brief note explaining the modifications to [info@sleekteak.com](mailto:info@sleekteak.com). Once received, we will update the CUT file accordingly and continue with the production of your custom SleekTEAK decking.
